Woodcutting guide rs3 f2p

In RuneScape 3, Woodcutting is a unifying skill that involves cutting down various trees and foliage. Typically, you will receive logs or some kind of resource when you cut trees. These logs can be sold or used for other skills such as Firemaking, Fletching and even Construction! In our Woodcutting guide for RS3, you will learn the fastest and most profitable methods to train your skills, right up to level 99/120. More skill guides Axes The main tool to use while exercising your wood cutting skills is an axe. As you go through the levels, you will have access to better axes that will cut trees faster. Protip: You can add a higher level axe to the tool belt and it will act like any previous axe. For example, if you add a dragon hatch to the level 1 tool belt, you will give yourself all previous axes. You don't have to buy each individual individually! The crystal hatch can be made by adding 4000 harmonious dust to a dragon hatch. This dust is achieved throughout Prifddinas, primarily by playing the harps. Crystal and dragon hatches can both be reinforced using Invention. Hatchet Woodcutting Level Req. Dwarven Army Axe 1 Bronze axe 1 Iron axe 1 steel axe 6 Black axe 6 Mithril Hatchet 21 Gritty Axe 31 Rune Hatchet 41 Dragon Hatchet 61 Inferno Adze 61 (Reqs. 92 Firemaking & All Fired Up Quest) Crystal Hatchet 71 Urns Urns fill up with experience as you train woodcarving (doesn't work with Ivy!), and when full is teleported off for a hefty experience boost. With the recent urn update, these can be stacked in your inventory and teleported automatically when they're full. This is a must tool if you are trying to achieve the best experience rates. Even lower level Urns are very effective. Each Urn requires an Earth Rune to be placed in it to begin to gather experience. This also requires a certain level of crafting. See the chart below to choose which type of Urn is best for you. Urn Crafting Req. XP Given Cracked Wood carving Urn 4 160 Fragile Wood carving Urn 15 425 Plain Woodcutting Urn 44 825 Strong Woodcutting Urn 61 1,662.5 Decorated Wood carving Urn 76 1900 A standard Wood cutting setup. Auras The Lumberjack Aura has five levels available. Each of them gives a gradually higher chance of cutting logs while Aura is active. When activated, Aura lasts for 1 full hour and has a cooling-off period of 3 hours. Auras are purchased through the loyalty points system. You get an increasing number of points each recurring month of membership. Aura Cut %age Increase loyalty points Lumberjack Aura 3% 5000 Larger Lumberjack Aura 5% 14,000 (19,000) Master

Lumberjack Aura 7% 33,500 (52,500 0) Supreme Lumb booked 10% 58,500 (111,000) Legendary Lumberjack Aura 15% 119,000 (230,000) Boost items There are many different equipmentable items that can help you with wood carving. Some offer experience increases, others offer useful benefits that will increase Element effect achieved by Lumberjack Outfit 1% experience boost per item, 6% total boost for the set Temple Trekking / Burgh de Rott Ramble Minigame (dropped by Zombies) Woodcutting Accumulator 2500 experience per use. When you fail to cut a log, it fills the device similar to an Urn made with invention or purchased from Grand Exchange Log-splitting Scrimshaw 15% chance of destroying a log when cut, providing an experience boost Player Owned Ports or purchased from Grand Exchange Strung Rabbit Foot Increases the fall rate of Crystal Geodeses & Bird Nests containing eggs purchased from the Grand Exchange, requires level 24 Hunter Sentinel Outfits 5% -7% experience boost, many different benefits depending on the outfit type Treasure Hunter Perks Augmenting axe will not only allow you to get some great invention experience, but also improve your overall Woodcutting experience per hour. See the Component combinations section for the best compositions to use when you try to make each benefit. Perk Effect Component Combinations Honed (tiers 1-5) Increases the chance of a successful cut by 2% per tier 5 Sharp 4 Precise, 1 Sharp 5 Silent Furnace (levels 1-3) Chance to consume some resources in exchange for double experience. 5.5%-16.5% chance depending on tier 5 Sharp 5 Dragonfire 5 Permeated Known Requires Level 33 Summons, Beaver famously gives you an invisible Woodcutting boost on two levels. This amounts to about a 3.5% cut rate increase. Beaver bags are relatively cheap and are a great boost for exercise. It will also collect various logs and planks while it is summoned! Rapid method levels 1-15: Common trees Regular trees are found almost everywhere in RuneScape. A good place to start would be off the Grand Exchange. Level 15-30: Oak trees A little south of where we just were, near the Varrock West Bank, three Oak trees are located near each other. Whether you want to knock the logs or not, this is a convenient location. Level 30-35: Willow Trees There is an abundance of Willow trees just outside Draynor bank. This is a great place to cut them. Willow logs are not worth much and you will only be here for a short time, so banking is not required unless you plan to use the logs for other purposes. Levels 35-47: Teak Trees Cutting Teak trees inside tai bwo wannai is a great method for quick experience. You need 100 Trading Sticks to get in, but these can be purchased from GE for a low price. There is no bank nearby, so you will want to powercut these. This just means that you should drop the logs as you cut them to maximize your experience per hour. You can bind the logs to your ability line to do this quickly and easily. Level 47-80: Acadia Trees Found in the Imperial District of Menaphos, Acadia trees are one of the best methods to train your Woodcutting quickly. Think of them as an improved version of Teaks. They can also be found in the VIP Skilling area of Menaphos if you have access to it. Levels 80-99: Acadia Trees with Crystallisms This will also require 88 Magic and (optionally, recommended) 80 Prayer. When you reach level 80, you are able to complete the Within The Light quest to access the crystallizing spell, and Light Form prayer. By applying the formula to a tree, you will not receive any resources, and instead get a 50% experience boost. If the prayer is active at the same time, there will be a total boost of 87.5% increase experience. Profit method Follow the above quick method to level 90. Level 90-99: Elder Trees Unfortunately, most trees in RuneScape 3 do not provide a good source of profit. Logs like Yews and Magics used to be great, but with the emergence of loot board drops of these items, their prices fell sharply. I do not recommend Woodcutting for profit until at least level 90. Oldest logs do not exist on any monster drop tables, so their price will be consistently high. When you reach level 90, you can cut these trees for some good money while AFKing! Older trees are unique per player. Each tree can be cut for a total of 5 minutes before emptying, and takes 10 minutes to respawn. There are a total of 10 older trees around the map, so you will never run out. The best rotation is as follows: South of Yanille & Northwest of Tree Gnome Stronghold bank (use bank if necessary) & South of Draynor Village bank (bank again before teleporting back to Yanille) AFK Method Follow the fixed method above to level 68. Level 68-94: Suffocating Ivy Ivy is significantly the most AFK Woodcutting method in the entire game. It is found in various areas around the game growing on the sides of walls and buildings. It will provide absolutely no resources except the occasional Bird Nest. Click to cut, it's as simple as that! The easiest way to reach Ivy is to use varrock lodestone and run north into the castle courtyard. Head east towards the agricultural patch, and you'll find five patches of Ivy to cut. Levels 94-99: Crystal Trees There are seven choppable Crystal trees scattered around the map. Only one tree is active at a time. To find the location, right-click an inactive crystal tree and use the Look at option. Using this, it will ask for a message in the chat box saying Tree leans slightly towards [the direction]. Use the map to determine which tree is active based on the following locations. Alternatively, you can use a friend chat like Tree Hunt that calls out new active trees. Location Nearest Teleport Near Gnome Ball Field Spirit Tree, Eagles' Peak Lodestone Southeast for Lighthouse Games Necklace, Lyre Seers' Village Seers' Lodestone Dark Wizard's Tower Falador Lodestone West of Brimhaven Karamja Lodestone South of Yanille Yanille Lodestone West for Observatory Ring of Duelling (Castle Wars teleport) Follow the quick method above to level 90. You need 96 Fletching to make these methods effective. Levels 90-96: Bamboo If You Are To complete Arc's content and also want some Woodcutting experience, Bamboo is a great way to go. You can cut as much ordinary bamboo as you want in Waiko, averaging about 80 bundles per hour. The experience here is not great, and in fact it is even slower than Ivy. However, it is incredible AFK. Levels 96-99: Golden Bamboo By reaching level 96 Wood carving, you will have the chance to find private islands with Golden Bamboo spawns. Each node gives you enough resources for a total of 100 bundles. This method provides over twice the experience rate of ordinary bamboo, reaching up to 120k per hour. That, combined with the AFK factor, makes this method a good choice for training. Training.
